25

A textured article comprising: a substrate having at least two surfaces; and raised elements on at least one surface of the substrate, wherein the article is useful for providing skin or hair care benefits.

15

2. The article according to claim 1 wherein the substrate is selected from the group consisting of a woven fabric, a knit fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked fabric, and combinations thereof.

153

The article according to claim 1 wherein the raised elements are formed from hot melt coatings comprising a polymer selected from the group consisting of olefin polymers, block copolymers, and combinations thereof.

The article according to claim 3 wherein the hot melt coating comprises from about 15% to about 100% olefin polymer or a block copolymer, from about 0% to about 60% tackifying resin, and from about 0% to about 50% wax.

103

The article according to claim 1 wherein the raised elements are discrete 103 and are in a shape selected from circular dots, hexagons, hearts, diamonds, rectangles, stars, and triangles.

The article according to claim 2 wherein the substrate has a basis weight ranging from about 200 grams per meter to about 500 grams per square meter.

The article according to claim 5 wherein the discrete raised elements cover from about 10 percent to about 90 percent of the surface of at least one side of the substrate.

15%

1,3

The article according to claim 6 wherein the discrete raised elements have a diameter ranging from about 0.5 mm to about 3 mm.

- 16: The article according to claim 1 further comprising a skin or hair care composition.
- A method of providing an exfoliating wipe comprising:
  providing a substrate selected from the group consisting of a woven fabric, a knit
  fabric, a nonwoven fabric, a laminate of a fabric and a polymeric film, a flocked
  fabric, and combinations thereof; and pattern coating raised elements onto the
  substrate utilizing a hot melt coating selected from the group consisting of olefin
  polymers, block copolymers, and combinations, thereof.
- The method according to claim 11 wherein the pattern coating is applied by a method selected from hot melt rotary screen coating and hot melt gravure coating.
- $\sqrt{3}$ . A method for cleansing the skin or hair comprising topically applying the  $\sqrt{6}$  article of claim 1 to said skin or hair.
- 14. The article of claim 1 wherein the article is in the form of a dry or wet
- A method for cleansing exfoliating or massaging the skin comprising topically applying the article of claim 1 toy said skin.
